

BASIC INVENTORY CONTROL

Track your inventory with ease...

Basic Inventory Control (BIC) allows you to track an inventory of products. Here's an overview of some of the major features and benefits of BIC:

FEATURES

General Features

- Track your inventory with ease
- Record and track a variety of inventory events such as: Order, Receipt, Shrinkage, Allocation, and Shipment
- View physical units in stock, allocated units, available units in stock, units on order, cost of on order items, cost of physical units in stock, retail value of physical units in stock, average unit cost and average unit price among other useful information
- Simple, intuitive user interface

Customizable, Unlimited Views and Reports

- Create unlimited number of customized views and reports of your inventory
- Specify title, what columns to display, and the order of columns
- View an inventory of products filtered by product group, inventory level, product name and/or part number
- Easily indicate products to re-order or products that are out of stock
- Record transactions for multiple products
- View transaction history filtered by transaction type, date range, product, category, and/or account
- Save displayed data to a MS Excel comma-delimited file

Data Import

- Import product list and beginning inventory from a MS Excel comma-delimited file

Multi-user Support

- BIC can be used in a single-user or multi-user environment

FEATURES (continued...)

Self-contained, simple installation

- Requires only 3 to 6 MB of disk space to install
- There is no need to install additional components such as ODBC drivers, and Microsoft Data Access Components (MDAC)
- The installation takes less than a minute on most systems

Online Help

- BIC features context-sensitive Windows Help
- A tutorial is available online to get you started
- BIC Help is fully searchable
- Help is only a click away from anywhere in the system

SPECIFICATIONS

Database Format:

Microsoft FoxPro-compatible, industry standard DBF file format
