

FAQ and Help Composer

The easy way to compose FAQs and Windows HTML Help Files

FAQ Composer is an authoring tool to compose Frequently Asked Questions and Help Topics in HTML, XML, Text and Windows Help Formats. FAQ Composer also serves as a fully searchable knowledge base. Try it **free** for 30-days!

FEATURES

- Compose content once and generate output in various formats: HTML, Text, Windows Help (chm) & XML
- Generate indexed FAQs for your website for multiple products/services. Place all FAQs on one HTML page or distribute among multiple HTML pages
- Generate Windows HTML Help files for your software products
- Generate XML conforming to a well-defined schema representing your content for consumption by other tools
- Organize Frequently Asked Questions (FAQs) and Help Topics by Product/Service and Category. Share FAQs and help topics among multiple products/services. Link related FAQs and help topics
- Search FAQs and help topics by Product/Service, Category, Question/Topic, and/or Answer
- Numerous options to customize your output using cascading style sheets (css), HTML templates and XSLT
- Spell check your content with your Microsoft Word dictionary (optional)
- Windows Help (F1) at your fingertips
- Extensive Support & FAQs at our website: FAQComposer.com
